

# Tower Tech for Data Centers

EDGE/ENTERPRISE/CLOUD/HYPERSCALE

## Accelerated Deployment. High Purity.

Tower Tech's modular design enables accelerated deployment and installation for data centers. Our factory-assembled towers are available in both the TTCC closed-circuit and TTXR open-circuit with a heat exchanger design. Tower Tech modular cooling towers maintain the purity and uptime that data centers depend on and deliver the best lifetime value of any tower on the market. Tower Tech's Fiber Reinforced Polymer (FRP) design is lighter than metal and inherently resistant to corrosion. Turn data center cooling upside-down with the sustainable efficiency of Tower Tech.

## Footprint Reduction. Maximum Cooling Performance. Water Reduction Efficiency.

### Tower Tech's Promise

- A Full-line of Towers from Closed-Circuit to Open-Circuit Models
- Industry's Best Drift Rating to Minimize Water Waste
- TT Variable Flow Balances Power Consumption with Water Usage
- Significantly Lighter Weight than Metal
- Factory-Preassembled Modular Design for Industry's Fastest Delivery and Installation
- FlowThru™ Basin Mitigates Legionella Risks
- Multiple Fans for Greater Redundancy and Uptime
- Self-Cleaning SpinFree™ Variable Flow Nozzles to Minimize Maintenance
- XchangeTech™ Polymer Coils Maximize Heat Transfer at a Fraction of the Weight
- Optional Earthquake-, Storm- and Fire-Rating Upgrade to Withstand Almost Anything
